

PHOTOGRAPHS FROM THE NEW AMITY INCIDENT

Oil and sheen streaming from a salt marsh and around a dredge barge in Barbers Cut turning basin

Floating black oil beneath the quay before the "Big Flush"

The "Big Flush". Four tugs were used to force oil from beneath the quay

Close-up of the prop wash used

After the Flush. Barbers Cut Container Terminal quay is 1 mile long. Its supporting pillars were oiled

Skimming operations alongside the quay in Barbers Cut

Skimming operations in Barbers Cut

Oil stained salt marsh with sorbent sausage boom

Steam cleaning and cold water flushing of broken concrete rip rap. Sorbent booms and snare catch released oil

Decontamination of a section of the 9000+m of boom used
