

Poseidon Challenge

The Management and Board of Directors of The International Tanker Owners Pollution Federation Limited have taken note of the Poseidon Challenge and express their support for the principles on which the Challenge is founded. ITOPF has been working closely for over 30 years with all interested parties in the maritime sector to advance the common cause of effective spill response.

ITOPF is a non-profit organisation established by the shipping and oil industries for the purpose of providing practical technical advice to deal with the consequences of pollution from ships. By promoting effective counter-measures to be taken in the event of spills, ITOPF is actively engaged on a day-to-day basis on behalf of shipowner Members and Associates in minimising pollution damage to the marine environment, and by helping to ensure that fair and reasonable compensation is paid in accordance with applicable laws and rules.

ITOPF remains ready to serve its membership and other stakeholders through educational programmes and specific advisory assignments aimed at sharing experience and knowledge gained within its area of expertise.

The continuing work of the Federation in improving spill preparedness and response demonstrates the collective commitment of the world's shipowners to protecting the environment.

London, March 2006
