

ITOPF 2024

R&D Award

Funding available for research projects on accidental spills of oil and cargo in the marine environment

ITOPF is recognised and respected internationally as a source of objective technical expertise on accidental spills of oil, chemicals and other substances in the marine environment.

The ITOPF R&D Award provides financial support for projects which have the potential to lead to improvements in spill related matters. **Up to £60,000 is available for short-term projects (1-2 years) and up to £40,000 for PhD projects, plus a student stipend and university fees** (see over for more details).

The Award is open to any reputable R&D establishment or other organisation worldwide intending to fund a project team or PhD candidate to undertake relevant research. Applications are invited from all academic disciplines, although preference will be given to those with an applied scientific focus and a potential impact on ESG-related themes.

This year, special consideration will be given to projects addressing:

- AI applications for spill response
- Emerging fuels
- Plastic & HNS spills
- Mariculture
- Remote sensing (imagery and sampling/analysis)

To apply for the ITOPF R&D Award, please visit our website at www.itopf.org/in-action/r-d-award/

For further information contact us at rdaward@itopf.org

Important dates

1st September – Applications open

1st December – Applications closing date

April 2024 – Award granted

Funding explained

Each year, the ITOPF R&D Award provides financial support for a short-term or PhD project which has the potential to lead to improvements in spill related matters, including (but not limited to) preparedness, monitoring, response, environmental effects, and impact mitigation.

Funding is available at the following levels:

- **Short-term projects:** up to £60K – this can be spread over 1-2 years and can include research costs, staff costs and overheads, and travel expenses.
- **PhD research projects:** up to £40K – this sum is provided for research costs in instalments for the duration of the PhD (up to 4 years). Additionally, for the duration of their research, a competitive annual stipend (living expenses) and contribution towards tuition fees are payable to the successful candidate each year. The exact amount awarded towards the stipend and tuition fees is dependent on the location of the host institution.

About ITOPF

ITOPF is maintained by the world's shipowners and their insurers on a not-for-profit basis to promote effective response to spills of oil, chemicals and other substances in the marine environment.

Since ITOPF's establishment in 1968, our technical staff have attended on-site at over 840 shipping incidents in 100 countries to provide objective and scientific advice on clean-up measures, the effects of pollutants on the environment and economic activities, and on compensation. These incidents can involve oil, chemicals and other bulk or packaged cargoes, as well as bunker fuel from all types of ship.

Our first-hand experience of pollution incidents is utilised during contingency planning and other advisory assignments for government and industry. We are an authoritative source of information on marine spills and share our knowledge at training courses and seminars throughout the world, encouraging best practice through outreach and education.

As part of our mission to promote effective spill response, we are proud to invest in R&D on behalf of our shipowners and their insurers.
